

2010 ANNUAL GLUCAGON DRIVE

Camp STIX and AYUDA (American Youth Understanding Diabetes Abroad) are once again working together on our annual glucagon drive. Bring your expired (or nearly expired) glucagon to camp to be distributed at our sister camp, Campo Amigo in Ecuador. Last year Camp STIX supplied more than 50 kits to kids who otherwise would have no immediate treatment for an unconscious hypoglycemic episode or seizure. Every year we collect more for donation and hope to continue the trend. One of our authorized health care professionals will be happy to write a script for a replacement kit.
