

Annual Camp STIX & Insulin for Life USA Glucagon Drive

Insulin for Life USA is a not-for-profit with a mission to rescue unused diabetes supplies here in the United States and deliver them to people across the world who have no access to these life saving necessities.

Camp STIX works to help Insulin for Life USA with our annual glucagon drive. Bring your unopened glucagon with three (3) months to use-by date to camp and we will donate them to Insulin for Life. With your help, Insulin for Life USA supplies these kits to people with diabetes who otherwise would have no immediate treatment for an unconscious hypoglycemic episode or seizure. We hope to continue the trend. One of our authorized health care professionals will be happy to write a prescription for a replacement kit.
